

2026 Train the Trainers: Strengthening Skills in Access Technology Assessments

About

Are you ready to sharpen your expertise in access technology assessments? Join MDE RBLV for a dynamic three-part workshop designed specifically for teachers of students with blindness or low vision (TVIs).

Through interactive demonstrations, guided practice, and collaborative discussions, participants will learn to:

- conduct thorough assessments of student technology needs
- partner effectively with families, educators, and service providers
- identify and recommend the right tools to foster independence
- integrate practical strategies and resources into everyday instruction

Participants will also gain skills, resources, and strategies to support students in achieving academic and functional success, both in and beyond the classroom.

Audience

This workshop is for school personnel and adult family members supporting students in Michigan who are blind or low vision (BLV). College students studying BLV-related professions are also invited to attend.
