

## Assistive Technology Student Assessments

### Event Description

This summer, the Michigan Department of Education - Low Incidence Outreach (MDE-LIO) will once again provide assistive technology (AT) assessments for students with a visual impairment. These assessments help pair students with AT solutions that meet their needs and enable them to complete tasks as independently as possible.

AT assessments should be part of an ongoing process with the student's educational team. It is valuable for identifying devices, tools, and services that will help students improve their functional capabilities in achieving individualized education program (IEP) goals.
