

DHH Swap Meet: East Michigan

Event Description

This half-day event will include a specially-recorded presentation by Dr. Tina Childress, an educational audiologist who is widely respected for her knowledge and expertise with cochlear implants, assistive technology, aural rehabilitation, and the social-emotional implications of hearing loss on children. Childress' presentation will provide the most up-to-date and effective resources and tools for technology, connectivity, online learning, and accessibility for students who are Deaf or Hard of Hearing (DHH).

The second part of the event will allow time for attendees to "swap," or share, resources and ideas. Each attendee will take a few minutes to share an effective tool, resource, practice, or activity for supporting the needs of children and students who are DHH and their families. Attendees will also have time to share common challenges, brainstorm solutions, and network with others. Notes and resources will be captured and shared after the event.

Participants will:

- Learn evidence-based practices for supporting students who are DHH and their families
- Identify solutions to common challenges shared by DHH school personnel from their region
- Increase their professional network by meeting with colleagues from their region
