

## A Peek Inside Early Involvement

### About

Families are shaped by their unique experiences, including different cultures, heritage, dynamics, structures, languages, and resources. Families on the journey of raising young children, ages 0-3, who are Deaf or Hard of Hearing (DHH), may seek or benefit from additional supports and/or experiences. Early involvement requires a different set of tools and resources to support not only the child, but the goals and needs of the family. This half-day workshop will highlight how you can support families throughout this process.

#### Audience:

This workshop is for school personnel supporting students in Michigan who are DHH, ages 0-3.
